David Tortajada

Senior Java Developer & E-commerce Consultant

Santander, Cantabria, Spain · (+34) 655 579 880 · mail@davidtor.es · davidtor.es · mareaweb.es · linkedin.com/in/davidtor · github.com/lomuko

Senior Java developer with more than 15 years building and maintaining e-commerce and enterprise platforms for international retailers. Java, Spring and Intershop specialist, working end to end from feature development to production support, now on Java 17/21 and Spring Boot 3. Through Mareaweb I also build websites, custom applications and AI tools for small businesses. I value clean, maintainable code and understanding the business before writing the first line.

Experience

Freelance Java & Intershop Consultant

Nov 2020 — Present

Valtech / Wunderman Thompson Commerce · Mareaweb · Remote from Cantabria

- Back-end specialist on international projects for leading European retailers, focused on scalability and performance.
- Built core features and REST APIs, integrating third-party systems with Intershop, Java and Spring.
- Optimised Solr search for faster, more relevant product discovery, and tuned Oracle and MSSQL queries for high-concurrency 24/7 traffic.
- Launched Mareaweb, offering websites, online shops, custom business applications, SEO and AI assistants to small businesses, with working demos published.
- Kept the stack current with Java 17/21 and Spring Boot 3 on microservice architectures.
- Day-to-day stack: JavaScript, Node, Solr, unit testing, Git, CI/CD, Jira, Linux, AWS and Azure, in agile teams.

Java & Intershop Consultant

Jul 2013 — Oct 2020

Incentro · Santander, Spain

- Consulted for Wolters Kluwer NL, G-Star RAW, Coop, Novamedia (Nationale Postcode Loterij), Grupo Electro Stocks, Atag and Rechtwijzer, among others.
- Worked remotely from Spain across Intershop 7.5, 7.6 and 7.7, including a full migration to 7.9.
- Developed new features and maintained live shops: imports, user management, products, catalogs, promotions, content, images, replications and Solr search.
- Handled DevOps and server management, with 24/7 on-call maintenance keeping every environment running.
- Also worked with Scala, Angular and the Play! framework alongside the core Java, Spring, Oracle and Git stack.

C# Developer

Jan 2013 — Jul 2013

Santander Town Hall · Santander, Spain

- Built the internal application used by the municipal tow service.
- Designed the application and its web services on a domain-oriented layered architecture.
- Stack: C#, .NET, Entity Framework, ext.net, WCF, Oracle, VS2010.

Java Analyst

Aug 2008 — May 2012

Quality Objects · Madrid, Spain

- Analyst for Mutua Madrileña (mutua.es), supporting and maintaining the public website.
- Developed web applications with J2EE, RAD (Eclipse), WebSphere and DB2.
- Built and maintained a range of internal applications for the client.
- Stack: Spring, Hibernate, web services, Struts and jQuery.

Junior Developer

Feb 2007 — Jun 2008

Indra · Madrid, Spain

- Developed the insurance platform for the client Aviva.
- Web programming on the MVC pattern in J2EE, with UML design on an MDA architecture (AndroMDA).
- Stack: Java, JavaScript, JSP, UML, CSS, Ajax, Struts, Spring, Hibernate, SOA.

Skills

- Web application development, front to back
- Java 17/21, Spring Boot 3, J2EE, C#/.NET
- E-commerce: Intershop 7.5 to 7.9 in depth
- REST APIs and system integration
- Search and data: Solr, Oracle, MSSQL, DB2, InfluxDB
- DevOps and cloud: AWS, Azure, Git, CI/CD, Jenkins, Docker
- Next.js web apps and AI-assisted development
- Web, SEO and applied AI for businesses
- IoT and automation with Home Assistant
- Scrum (PSM I), Kanban, agile delivery
- Problem-solving and fast learning
- Reliable, detail-oriented, committed

Education
